

Rename/Regroup Layers

Command Description

The Rename/Regroup Layers command lets you select layers and add a prefix and/or suffix to the layer names and group them if required.

The screenshot shows the 'Rename Layers' dialog box with the following fields and options:

- Rename**
 - Prefix:
 - Suffix:
- Regroup**
 - Group name:
- Filter by selection:
 - Selected: 0
- Layers table:

Rename	Layer Name	Layer Group
<input type="checkbox"/>	0	
<input type="checkbox"/>	Points	

Buttons at the bottom:

1. Tick the required fields of **Rename** and/or **Regroup**
2. If using the **Rename**, enter a Prefix and/or Suffix in the box for the layers selected.
3. If using the **Regroup**, enter a new group name to group the selected layers.
4. Do either of the following:
 - Click in the **Filter by selection** field and then in a graphic view select any data you want to change, and those layers will be selected in the list below.
 - Alternatively, you may tick any layers in the list to use.
5. Use the (De)select All button to either select all the layers in the list or deselect any layers in the list that are currently selected.
6. Do either of the following:
 - Click **Apply** to apply the changes and keep the **Rename/Regroup Layers** command pane open.
 - Click **OK** to apply the changes and close the **Rename/Regroup Layers** command pane.
