

### Installation Instructions for ANZ Toolbox in TBC V5.3\*

Close TBC and run the executable. Once complete open TBC, press F12 to get a command pane and type "ANZToolboxLicense". A window will pop up which will allow you to request a license. Press the "Request License" button. This will populate a new email including the appropriate email address and subject line. Add your company details and a screen snap of the license manager in TBC and press send.

**Note:** If for some reason the 'Request License' button does not open a pre-filled email, click the 'Copy License Request to Clipboard' button, paste into a new email and send to ANZToolbox@sitechcs.com.

Once you receive your license file, press the 'Add License File' button and locate the file.

If you would like to create a toolbar ribbon for the 'ANZ Toolbox' Press F12 to get the command pane and type 'ANZToolboxRibbon'. This will create a custom ribbon containing all the current commands. Please note that this will reset your toolbar to default settings in the process. When you update TBC to a new version you may need to re-run the toolbar ribbon command to restore the ribbon.
